### ERP SOFTWARE MARKET & FUTURE:

The ERP market is a multi-billion dollar industry that provides solutions to support a variety of Business Functions and is dominated by major MNC Vendor's like SAP, Oracle, Microsoft, etc. For nearly two decades, ERP software systems have evolved from standalone to online integrated model including SCM & CRM. Software as a Service (SaaS) or Cloud / Mobile Model with enhanced Analytics and Business Intelligence has clearly entered the ERP industry as a disruptive technology. SaaS ERP hosted delivery has also reduced IT complexity while promoting anytime and anywhere access.

### ABOUT ERP (Enterprise Resource Planning):

ERP is a Business Management Software - usually a suite of integrated applications - that a company can use to collect, store, manage and interpret data from many business activities and automate BackOffice functions. ERP software integrates all facets of an operation, including product planning, development, manufacturing processes, sales, marketing, etc. Though early ERP systems focused on large enterprises, now smaller enterprises increasingly use ERP systems.
